Independent Auditor's Report

To the board of directors of Powertip Technology Corporation:

Audit opinions

We have audited the balance sheet of Powertip Technology Corporation as at December 31, 2023 and 2022, and the statement of comprehensive income, statement of changes in equity, cash flow statement, and the accompanying footnotes (including summary of key accounting policies) for the periods January 1 to December 31, 2023 and 2022.

In our opinion, all material disclosures of the parent company only financial statements mentioned above were prepared in accordance with Regulations Governing the Preparation of Financial Reports by Securities Issuers and the version of International Financial Reporting Standards, and presented a fair view of the financial position of Powertip Technology Corporation as at December 31, 2023 and 2022, and business performance and cash flow for the periods January 1 to December 31, 2023 and 2022.

Basis of audit opinion

We have conducted our audits on the financial statements in accordance with Regulations Governing Auditing and Attestation of Financial Statements by Certified Public Accountants and the auditing standards. Our responsibilities as an auditor for the parent company only financial statements under the abovementioned standards are explained in the Responsibilities paragraph. All relevant personnel of the accounting firm have followed CPA code of ethics and maintained independence from Powertip Technology Corporation when performing their duties. We believe that the evidence obtained provide an adequate and appropriate basis for our opinion.

Key audit issues

Key audit issues are matters that we considered to be the most important, based on professional judgment, when auditing the 2023 parent company only financial statements of Powertip Technology Corporation. These issues have already been addressed when we audited and formed our opinions on the parent company only financial statements. Therefore we do not provide opinions separately for individual issues. Below are the key audit issues that we consider relevant for disclosure in this audit report:

I. Revenue recognition

Please refer to Note 4 (14) "Revenue recognition" in the parent company only financial statements for the accounting policy on revenue recognition; please refer to Note 6 (12) "Revenue from contracts with customers" for additional information on revenue.

Explanation of key audit issues:

Powertip Technology Corporation mainly engages in the manufacturing and sales of various LCD modules. Operating revenue is one of the important items in the parent company only financial statements, and the amount and changes in the operating revenue may affect the financial statement users' understanding of such statements. For this reason, revenue recognition testing was identified as one of our key audit matters when we audited the parent company only financial statements of Powertip Technology Corporation.

Audit procedures:

Our main audit procedures for the above key audit matter included testing the control over the sales and collection cycle, checking and adjusting the sales system data and the general ledger, sampling and testing the details of the relevant supporting documents, and assessing if the timings of Powertip Technology Corporation's recognition of operating revenue and the recognized amounts were handled in accordance with the relevant standards.

Responsibilities of the management and governance body to the parent company only financial statements

Responsibilities of the management were to prepare and ensure fair presentation of parent company only financial statements in accordance with "Regulations Governing the Preparation of Financial Reports by Securities Issuers" and to exercise proper internal control practices that are relevant to the preparation of consolidated financial statements so that the parent company only financial statements are free of material misstatements, whether caused by fraud or error.

The management's responsibilities when preparing parent company only financial statements also involved: assessing the ability of Powertip Technology Corporation to operate, disclose information, and account for transactions as a going concern unless the management intends to liquidate Powertip Technology Corporation or cease business operations, or is compelled to do so with no alternative solution.

The governance body of Powertip Technology Corporation (including the Audit Committee) is responsible for supervising the financial reporting process.

Responsibilities of the auditor when auditing parent company only financial statements

The purposes of our audit were to obtain reasonable assurance of whether the parent company only financial statements were prone to material misstatements, whether due to fraud or error, and to issue a report of our audit opinions. We considered assurance to be reasonable only if it is highly credible. However, audit tasks conducted in accordance with the auditing principles do not necessarily guarantee detection of all material misstatements within the parent company only financial statements. Misstatements can arise from fraud or error. Misstatements are considered material if the individual

amount or aggregate total is reasonably expected to affect economic decisions of the parent company only financial statement user.

When conducting audits in accordance with the auditing principles, we exercised judgments and skepticism as deemed professionally appropriate. We also performed the following tasks as an auditor:

- 1. Identifying and assessing risks of material misstatement due to fraud or error; designing and executing appropriate response measures for the identified risks; and obtaining adequate and appropriate audit evidence to support audit opinions. Fraud may involve conspiracy, forgery, intentional omission, untruthful declaration, or breach of internal control, and our audit did not find any material misstatement where the risk of fraud is greater than the risk of error.
- 2. Developing the required level of understanding on relevant internal controls and designing audit procedures that are appropriate under the prevailing circumstances, but without providing opinion on the effectiveness of internal control system of Powertip Technology Corporation.
- 3. Assessing the appropriateness of accounting policies adopted by the management, and the rationality of accounting estimates and related disclosures made.
- 4. Forming conclusions regarding the appropriateness of management's decision to account for the business as a going concern, and whether there are doubts or uncertainties about the ability of Powertip Technology Corporation to operate as a going concern, based on the audit evidence obtained. We are bound to remind users of parent company only financial statements and make related disclosures if uncertainties exist in regards to the abovementationed events or circumstances, and amend audit opinions when the disclosures are no longer appropriate. Our conclusions are based on the audit evidence obtained up to the date of audit report. However, future events or change of circumstances may still render Powertip Technology Corporation no longer capable of operating as a going concern.
- 5. Assessing the overall presentation, structure, and contents of the parent company only financial statements (including related footnotes), and whether certain transactions and events are presented appropriately in the parent company only financial statements.
- 6. Obtaining sufficient and appropriate audit evidence on the financial information of equity-accounted investments, and expressing opinions on the parent company only financial statements. Our responsibilities as auditor are to instruct, supervise, and execute audits and form audit opinions on Powertip Technology Corporation.

We have communicated with the governance body about the scope, timing, and significant findings (including significant defects identified in internal control) of our audit.

We have also provided the governance body with a declaration of independence stating that all relevant personnel of the accounting firm have complied with auditors' professional ethics of the Republic of China, and communicated with the governance body on all matters that may affect the auditor's independence (including protection measures).

We have identified the key audit issues after communicating with the governance body regarding the 2023 parent company only financial statements of Powertip Technology Corporation. These issues have been addressed in our audit report except for: 1. Certain topics that are prohibited by law from disclosing to the public; or 2. Under extreme circumstances, topics that we decide not to communicate in the audit report because of higher negative impacts they may cause than the benefits they bring to public interest.

Powertip Technology Corporation Notes to Parent Company Only Financial Statements 2023 and 2022

(Unless otherwise specified, all amounts are presented in NTD thousands)

I. Company history

Powertip Technology Corporation (the Company) was incorporated on September 2, 1991 under the approval of the Ministry of Economic Affairs, and has business address registered at No. 8, Gongyequ 6th Road, Xitun District, Taichung City. The Company is mainly involved in the manufacturing, processing, and trading of various types of LCD display module.

II. Financial statement approval date and procedures

The parent company only financial statements were passed during the board of directors meeting dated March 12, 2024.

III. Application of new and amended standards and interpretations

(I) Effect of adopting the latest and amended standards and interpretations approved by Financial Supervisory Commission ("FSC")

The Company became subject to the newly revised international financial reporting standards listed below since January 1, 2023, and the adoption of which had no material impact on the parent company only financial statements.

- Amendments to IAS 1 regarding "Disclosure of Accounting Policies"
- Amendments to IAS 8 regarding "Definition of Accounting Estimates"
- Amendments to IAS 12 regarding "Deferred Tax related to Assets and Liabilities arising from a Single Transaction"

The Company became subject to the newly revised international financial reporting standards listed below since May 23, 2023, and the adoption of which had no material impact on the parent company only financial statements.

• Amendments to IAS No. 12 "International Tax Reform- "Pillar 2 Template"

(II) Impact of not adopting FSC-approved IFRS

Based on the Company's own evaluation, adopting the newly revised international financial reporting standards listed below that take effect from January 1, 2024 onwards do not have material impact on the parent company only financial statements.

- Amendments to IAS 1 regarding "Classification of Liabilities as Current or Non-current"
- Amendments to IAS 1 "Non-current Liabilities with Covenants"

- Amendments to IAS 7 and IFRS 7 "Supplier Financing Arrangements"
- Amendments to IFRS 16 "Lease Liability in a Sale and Leaseback"
- (III) Newly published/revised standards and interpretations that are not yet approved by FSC The Company expects no material impact from the following newly published and revised standards that are not yet approved by FSC.
 - Amendments to IFRS 10 and IAS 28 regarding "Sale or Contribution of Assets Between an Investor and Its Associate or Joint Venture"
 - IFRS 17 Insurance Contracts and amendments to IFRS 17
 - Amendment to IAS No. 21 "Lack of Convertibility"

IV. Summary of significant accounting policies

Below is a summary of significant accounting policies adopted for the preparation of parent company only financial statements. Unless otherwise specified, the following accounting policies have been applied consistently across all periods presented in this financial statement.

(I) Statement of compliance

The standalone financial statements have been prepared in accordance with "Regulations Governing the Preparation of Financial Reports by Securities Issuers."

- (II) Basis of preparation
 - 1. Basis for measurement

This financial statement is prepared on the basis of historical cost, except for the key balance sheet items listed below:

- (1) Financial assets at fair value through profit or loss (including derivatives):
- (2) Financial assets at fair value through other comprehensive income; and
- (3) Net defined benefit liabilities, which is measured by deducting the present value of defined benefit plan obligations and the effect of the limits described in Note 4(16) from the fair value of pension fund assets.
- 2. Functional currency and presentation currency

The Company has designated its functional currency as the main currency used in the economic environment where operations take place. The parent company only financial statements are presented using the Company's functional currency (NTD). All financial figures denominated in NTD have been presented in NTD thousands.

(III) Foreign currency

1. Foreign currency transactions

Foreign currency transactions are converted into the functional currency using exchange rates as of the date of transaction. Foreign currency monetary items outstanding at the end of each reporting period (referred to as reporting date below) are subsequently converted into the functional currency using exchange rate applicable on that day.

Foreign currency-denominated non-monetary items carried at fair value are converted into the functional currency using exchange rate as of the valuation date. Foreign currencydenominated non-monetary items carried at historical cost are converted using exchange rate as of the initial transaction date.

Differences from foreign currency conversion are generally recognized through profit or loss, or recognized through other comprehensive income under the following circumstances:

- (1) Equity instruments designated to be carried at fair value through other comprehensive income;
- (2) Financial liabilities designated to hedge net investment in foreign operations, within the effective scope of hedge; or
- (3) Qualifying cash flow hedge, within the effective scope of hedge.

2. Foreign operations

Assets and liabilities of foreign operations, including goodwill and fair value adjustments arising at the time of acquisition, are converted into the functional currency using exchange rates as at the reporting date. Income, expenses, and losses are converted into the functional currency using average exchange rate for the current period. Any differences on exchange are recognized through other comprehensive income.

If a disposal of foreign operation results in a loss of control, joint control, or significant influence, all conversion differences previously accumulated on the foreign operation are reclassified into profit or loss. In a partial disposal of subsidiary that contains foreign operations, conversion differences previously accumulated on the subsidiary are reallocated proportionally to non-controlling shareholders. In a partial disposal of associated company or joint venture that contains foreign operations, conversion differences previously accumulated on the investment are reclassified proportionally to profit or loss.

For monetary receivables or payables of foreign operations that do not have defined settlement plans and are impossible to be settled in the foreseeable future, any gains/losses arising from foreign currency exchange are treated as a part of net investments in the foreign operation and recognized through other comprehensive income.

(IV) Classification of current and non-current assets and liabilities

Assets that meet one of the following conditions are classified as current assets; assets that do not meet the criteria for current asset are classified as non-current assets:

- 1. Assets that are expected to be realized, or intended to be sold or consumed, over the normal operating cycle;
- 2. Assets that are held mainly for the purpose of trading;
- 3. Assets that are expected to be realized within 12 months after the end of the reporting period; or

4. Cash or cash equivalents, except those that will be swapped or used to repay liabilities at least 12 months from the reporting period, and those with restricted uses.

Liabilities that match any of the following criteria are classified as current liabilities; liabilities that do not meet the criteria for current liability are classified as non-current liabilities:

- 1. Liabilities that are expected to be repaid within the normal operating cycle;
- 2. Liabilities that are held mainly for the purpose of trading;
- 3. Liabilities that are expected to be repaid within 12 months after the end of the reporting period; or
- 4. Liabilities with repayment terms that cannot be extended unconditionally beyond 12 months after the reporting period. Liabilities with terms that give counterparties the option to be repaid in the form of equity instruments do not affect their classification.

(V) Cash and cash equivalents

Cash includes cash on hand and demand deposits. Cash equivalent refers to short-term and highly liquid investments that are readily convertible to known amounts of cash and are subject to insignificant risk of changes in value. Time deposit that meets the abovementioned definition and is intended to meet short-term cash commitment instead of investment or other purposes is stated as cash equivalent.

(VI) Financial instruments

Accounts receivable and debt securities issued are recognized at the time occurred. All other financial assets and financial liabilities are recognized at initiation when the Company becomes a party to a financial instrument contract. Financial assets or liabilities that are not carried at fair value through profit or loss (excluding accounts receivable without major financial component) are initially measured at fair value plus transaction costs that are directly attributable to the acquisition or issuance. Accounts receivable without major financial component are initially measured at transaction price.

1. Financial assets

Purchase and sale of financial asset that conforms with customary practices is accounted using trade day accounting, and the same approach is applied consistently to financial assets of the same classification.

Financial assets are classified at initiation into: financial assets carried at amortized cost, financial assets at fair value through other comprehensive income, or financial assets at fair value through profit or loss.

Only when the Company changes the ways financial assets are managed will it reclassify the affected financial assets according to policy, starting from the next reporting period.

(1) Financial assets carried at amortized cost

Financial assets that meet all of the following conditions and are not designated to be

carried at fair value through profit or loss are carried at amortized cost:

- Financial assets that are held for the purpose of collecting contractual cash flow.
- Contractual terms of the financial asset give rise to cash flows on specific dates, and
 the cash flows are intended solely to pay principals and interests accruing on
 outstanding principals.

These assets are subsequently carried at initial cost plus/less accumulated amortization calculated using the effective interest rate method and after adjusting for loss provisions. Interest income, gain/loss on foreign currency exchange, and impairment loss are recognized through profit or loss. When removed from balance sheet, gains or losses are recognize through profit or loss.

(2) Financial assets at fair value through other comprehensive income

Debt instruments that satisfy all of the following conditions and are not designated to

be carried at fair value through profit or loss are carried at fair value through other

be carried at fair value through profit or loss are carried at fair value through other comprehensive income:

- Financial assets that are held for the purpose of collecting contractual cash flow and sale.
- Contractual terms of the financial asset give rise to cash flows on specific dates, and
 the cash flows are intended solely to pay principals and interests accruing on
 outstanding principals.

At initiation, the Company can make an irrevocable choice to account for subsequent fair value changes through other comprehensive income for equity instruments that are not held for trading. The above choice is determined on an instrument-by-instrument basis.

Investments in debt instruments are subsequently measured at fair value. Interest income calculated using the effective interest method, gain/loss on currency exchange, and impairment loss are recognized through profit or loss; other net gains or losses are recognized through other comprehensive income. When removed from balance sheet, amounts accumulated under other comprehensive income are reclassified into profit or loss.

Investments in equity instruments are subsequently measured at fair value. Dividend income is recognized through profit or loss (unless the dividends clearly represent a partial recovery of the investment cost). Other net gains or losses are recognized through other comprehensive income and are not reclassified into profit or loss.

Dividend income from equity investments are recognized on the day the Company becomes entitled to collect them (which is usually the ex-dividend day).

(3) Financial assets at fair value through profit or loss

Financial assets that are neither carried at amortized cost nor at fair value through other comprehensive income (such as those held for trading and for management and performance evaluation at fair value) are carried at fair value through profit or loss; this includes derivative financial assets. At initial recognition, the Company can make an irrevocable decision to designate financial assets that satisfy the criteria of being carried at amortized cost or at fair value through other comprehensive income to be carried at fair value through profit or loss, for the purpose of eliminating or reducing accounting mismatch.

Balance is initially measured at fair value with transaction costs recognized through profit or loss, and subsequently measured at fair value with remeasurement gains or losses (including any dividend and interest income) recognized through profit or loss.

(4) Impairment on financial assets

The Company recognizes loss provisions on financial assets carried at amortized cost (including cash and cash equivalents, notes and accounts receivable, other receivables, guarantee deposits paid, and other financial assets) based on expected credit loss.

Loss provisions for the following financial assets are made based on 12-month expected credit loss; for all other financial assets, loss provisions are made based on expected credit loss for the remaining lifetime:

- Debt securities that are deemed to be of low risk as of the reporting date; and
- Other debt securities and bank deposits that exhibit no significant increase in credit risk (i.e. risk of default over the financial instrument's expected duration) since initial recognition.

Loss provisions for accounts receivable and contractual assets are measured based on expected credit loss over the remaining lifetime.

When assessing whether a financial instrument has significantly increased in credit risk since initial recognition, the Company uses reasonable and verifiable information (that can be obtained without excessive cost or investment) including qualitative and quantitative data in conjunction with its own past experience, credit rating, and forecasts.

The Company considers a debt security to be of low credit risk if it is awarded a credit risk rating equivalent to the "investment grade" commonly recognized in the world (i.e. BBB by Standard & Poor-, Baa3 by Moody's, or twA by Taiwan Ratings, or higher). The Company considers credit risk to have increased significantly if contractual payment is overdue for more than 30 days.

The Company considers financial asset to have defaulted if contractual payment is overdue for more than 90 days, or if the borrower is unlikely to fulfill credit obligation and make pay full payment to the Company.

Expected credit loss for the remaining lifetime refers to the amount of credit losses that the financial instrument is likely to incur due to any possible default event in the remaining lifetime.

12-month expected credit loss refers to the amount of credit loss that a financial instrument may incur due to default event in the next 12 months (or shorter, if the financial instrument's expected remaining lifetime is less than 12 months).

The longest duration by which expected credit loss is measured is the maximum contract duration in which the Company is exposed to credit risk.

Expected credit loss is estimated by weighing credit losses for the remaining lifetime of a financial instrument against probability of occurrence. Credit losses are measured as the shortfall of cash collected, which is the difference between the amount of contractual cash flow collectible and the amount of cash flow the Company expects to collect. Expected credit losses are discounted at effective interest rate applicable to the financial asset.

The Company assesses financial assets carried at amortized cost for credit impairment on every reporting date. A financial asset is deemed to have credit-impaired if estimated future cash flow exhibits one or several adverse events. Evidence of credit impairment includes any observable data that can be used to establish the following with respect to a financial asset:

- The borrower or issuer encounters significant financial distress;
- Event of default, such as delinquency or more than 90-day overdue;
- The Company grants compromise to the borrower for reasons relating to financial distress or contractual obligation that the Company would not have done so otherwise:
- The borrower is very likely to file for bankruptcy or undergo financial restructuring;
 or
- Occurrence of financial distress that may cause the financial asset to be removed from active market.

Loss provisions on financial assets carried at amortized cost are deducted from book value. Loss provisions and reversals are recognized through profit or loss.

When the Company has reason to believe that it may not recover part or all of a financial asset, the total book value of financial asset is reduced directly to reflect the expectation.

If the counterparty is a corporate entity, the Company would analyze the timing and amount of charge-off based on rational expectations about recoverability. The Company expects no major reversal of amounts that it has charged off. However, the Company may still make claims on charged-off financial assets according to its recovery procedures.

(5) Removal of financial assets

Financial assets can be removed from balance sheet only if all contractual cash flow entitlements have ended, or if the asset has been transferred with virtually all risks and returns of ownership assumed by another party, or in situations where the Company neither transfers nor retains virtually all risks and returns associated with ownership and retains no control over such financial asset.

The Company will continue recognizing financial assets it has signed transfer agreement for on the balance sheet if it retains virtually all risks and returns associated with the ownership of the transferred asset.

2. Financial liabilities and equity instruments

(1) Classification of liabilities or equity

Debt and equity instruments issued by the Company are classified into financial liabilities or equity depending on the terms of the underlying contract and the definitions of financial liability and equity used.

(2) Equity transactions

Equity instrument refers to any contract that represents the Company's entitlement to assets net of liabilities. Equity instruments issued by the Company are recognized at the amount of proceeds received net of direct issuing costs.

(3) Financial liabilities

Financial liabilities are classified into those that are carried at amortized cost and those that are carried at fair value through profit or loss. Financial liabilities are carried at fair value through profit or loss if they are held for trading, characterized as derivative instrument, or designated to be so at initial recognition. Financial liabilities at fair value through profit or loss are carried at fair value with net gains and losses, including any interest expense, recognized through profit or loss.

Other financial liabilities are recognized at fair value plus directly attributable transaction costs at initiation, and subsequently measured at amortized cost using the effective interest method. Interest expenses and gains/losses on currency exchange are recognized through profit or loss. When removing from balance sheet, any gains or losses incurred are also recognized through profit or loss.

(4) Removal of financial liabilities

Financial liabilities are removed from the consolidated balance sheet upon fulfillment, cancellation, or expiry of contractual obligation. If a change in the terms of a financial liability alters cash flow by a significant extent, the old financial liability is removed and a new financial liability will be recognized based on the revised terms.

When a financial liability is removed, the difference between book value and the consideration paid or payable (including any non-cash assets transferred or any additional liabilities borne) is recognized through profit or loss.

(5) Offset of financial assets and liabilities

Financial assets and financial liabilities may be offset against each other and reported on the balance sheet in net amount only when the Company is legally entitled to do so, and has the intention to settle assets and liabilities in net amount or realize them both at the same time.

3. Derivative instruments and hedge accounting

The Company holds derivative instruments for hedging foreign currency and interest rate risks. For instruments with embedded derivatives, the embedded derivatives are accounted separately from the master contract if they meet certain criteria and that the master contract is not a financial asset. These derivatives are measured at fair value at initiation, and subsequently measured at fair value with remeasurement gains or losses recognized directly through profit or loss.

(VII)Inventory

Inventory is valued at the lower of cost and net realizable value. Cost includes all costs incurred to acquire, produce, process, and bring inventory to its usable state and location, and is calculated using the weighted average method. Cost of finished goods and work-in-progress includes manufacturing overheads, which are allocated proportionally based on normal production capacity. However, given the insignificant difference between actual and normal capacity, overheads were allocated based on actual capacity instead.

Net realizable value refers to the estimated selling price less all additional costs required for completion and all associated marketing expenses under normal circumstances.

(VIII)Investment in associated companies

Associated company is an entity in which the Company has significant influence over financial and operating decisions, but no single or joint control.

The Company accounts for associated companies using the equity method. Under the equity method, investments are accounted at acquisition cost at initiation; acquisition cost includes transaction cost. The book value of associated company includes goodwill recognized at initiation less any cumulative impairment losses.

The parent company only financial statements include profit or loss and other comprehensive

income from associated companies, recognized based on percentage of equity ownership and adjusted for consistency of accounting policy, from the day the Company gains significant influence until the day it no longer exercises significant influence. If an associated company undergoes a change of equity that is not attributed to profit, loss, or other comprehensive income and has no impact on the Company's shareholding percentage, the Company will recognize the change of equity proportionally in "Capital reserve."

Unrealized gains and losses arising from transactions between the Company and associated companies are recognized in corporate financial statements only for the percentage of ownership that is controlled by non-related investors.

The Company will stop recognizing losses on associated companies when its share of the loss equals or exceeds the value of equity held. The Company will recognize extra losses and liabilities only for legal obligations and constructive obligations occurred, or payments made on behalf of investees.

(IX) Investment in subsidiaries

When preparing parent company only financial statements, the Company accounts for controlled investees using the equity method. Under the equity method, the amount of current profit/loss and other comprehensive income attributable to parent company shareholders are consistent between parent company only and consolidated financial statements, and the amount of equity attributable to parent company shareholders are also consistent between parent company only and consolidated financial statements.

Change of ownership interest in a subsidiary without losing control is treated as equity transaction between owners.

(X) Property, plant, and equipment

1. Recognition and measurement

Property, plant, and equipment are recognized and measured using the cost method, and presented at original cost less accumulated depreciation and impairment. The original cost includes all cash outlays directly related to the acquisition of the asset. Furthermore, any software purchased for the purpose of integrating equipment functions is treated as a part of the equipment and is capitalized.

For any property, plant, or equipment that comprises several different components, each major component is treated as a separate property, plant, or equipment if it makes up a material part relative to total cost and if use of different depreciation rate or method is deemed more appropriate.

Gain or loss on disposal of property, plant, and equipment is recognized through profit or loss.

2. Subsequent costs

Subsequent expenditures are capitalized only when the Company is very likely to realize future economic benefits.

3. Depreciation

Depreciation is calculated using the straight-line approach, in which the cost of asset net of residual value is divided by the useful life of each component, and recognized through profit or loss.

No depreciation is provided on land.

The following useful life estimates are used for the current and comparative periods:

(1) Buildings and accessory equipment: 1-50 years

(2) Machinery: 1-8 years

(3) Molding equipment: 1-6 years

(4) Transport equipment: 1-5 years

(5) Office and sundry equipment: 1-10 years

The Company reviews its depreciation method, useful life, and residual value estimates yearly on each reporting date. Changes are made as deemed necessary and appropriate.

(XI) Leases

The Company evaluates whether a contract meets the criteria of (or contains arrangements characterized as) lease on the day of establishment. A contract is considered as lease or deemed to contain lease elements if it involves a transfer of control over identified assets for a period of time in exchange for consideration.

1. As a lessee

The Company recognizes right-of-use assets and lease liabilities on the lease start date. Right-of-use assets are measured at cost at initiation; this cost includes the initial amount of lease liability, adjusted for any lease payments paid on or before the lease start date, plus any initial direct costs incurred and any estimated costs to dismantle/remove the asset and restore the location or the asset to its original state, less any lease incentives received.

Right-of-use assets are depreciated on a straight-line basis from the lease start date until the end of useful life of right-of-use asset or until expiry of the lease tenor, whichever the earlier. Furthermore, the Company regularly assesses right-of-use assets for impairment and accounts for impairment losses as they occur. Right-of-use assets are also adjusted in circumstances where lease liabilities are subject to remeasurement.

Lease liabilities are initially measured as the present value of unpaid lease payments as at the lease start date. Interest rate implicit in a lease is used as the discount rate if it can be easily determined; if the rate can not be easily determined, the Company's incremental borrowing rate will be used as the discount rate instead. In general, the Company uses incremental borrowing rate as the discount rate.

The types of lease payments included in the calculation of lease liabilities include:

- (1) Fixed payments, including in-kind fixed payments;
- (2) Variable lease payments that are determined by certain index or rate, which are initially measured using index or rate as at the lease start date.

Lease liabilities subsequently accrue interest using the effective interest approach, and are remeasured in the following circumstances:

- (1) When there is a change in the index or rate used for determining lease payments, which leads to changes in future lease payments;
- (2) When there is a change in the likelihood of exercising lease extension/termination option, which may alter expectation about the lease tenor; and
- (3) When there is a change in leased asset, scope of lease, or other terms.

When lease liability is remeasured due to a change in the index or rate used to determine lease payment or due to a change in the assessment of purchase, extension, or termination option, a corresponding adjustment is also made to the book value of right-of-use asset at the same time. When book value of the right-of-use asset has been reduced to zero, further remeasurements are recognized through profit or loss instead.

Any contract amendment that reduces the scope of lease is accounted by reducing the book value of right-of-use asset by an amount that reflects partial or total termination of lease arrangement. Any difference between right-of-use asset and remeasured lease liability is recognized through profit or loss.

Right-of-use assets that do not meet the definition of investment property and lease liabilities are presented on the balance sheet as single-line items.

For short-term leases such as corporate vehicles and photocopiers and leases of low-value assets, the Company chooses not to recognize right-of-use asset or liability, but instead recognizes lease payments as expenses over the course of the lease tenor on a straight-line basis.

2. As a lessor

For lease arrangements where the Company is a lessor, the terms of the lease contract are evaluated to determine whether virtually all risks and returns associated with ownership of the asset are transferred on the day of lease commencement. If so, the contract would be classified as a financial lease; if not, the asset would be classified as an operating lease. When evaluating leases, the Company takes into consideration whether the lease tenor covers a major portion of the asset's useful life, among other indicators.

For lease arrangements where the Company is an intermediate lessor, the Company accounts for the master lease and the sublease separately, and classifies the sublease based on the right-of-use asset given rise by the master lease. If the master lease is short-term in nature

and is exempted from lease recognition, the sublease is classified as operating lease.

(XII) Intangible assets

1. Research and development

Expenses relating to research activities are recognized in profit or loss when incurred.

Development expenses are capitalized only if: the amount can be measured reliably; the product or process being developed is technologically or commercially feasible; the Company is very likely to receive future economic benefits; and the Company has both the intention and adequate resources to complete the development and make use or sell the completed result. All other development expenses are recognized through profit or loss when incurred. After initial recognition, capitalized development expenses are measured at cost less accumulated amortization and impairment.

2. Other intangible assets

Other intangible assets of limited useful life acquired by the Company are carried at cost less accumulated amortization and cumulative impairment.

3. Subsequent expenses

Subsequent expenses are capitalized only if they are able to increase future economic benefits of certain assets. All other expenses are recognized through profit or loss when incurred, including internally developed goodwill and brands.

4. Amortization

When accounting for amortization, the amortizable amount is determined as the cost of asset less residual value.

Except for goodwill and intangible assets with undefined useful life, intangible assets are amortized using the straight-line method over the useful life from the time they reach the usable state. Amortizations are recognized in profit or loss.

The following useful life estimates are used for the current and comparative periods:

- (1) Cost of computer software: 1-5 years
- (2) Patent: amortized over the number of useful years

The Company examines its amortization method, useful life, and residual value estimates for intangible assets on each reporting date. Changes are made as deemed necessary and appropriate.

(XIII)Impairment of non-financial assets

The Company evaluates non-financial assets (excluding inventory, contractual assets, and deferred income tax assets) for signs of impairment in the book value on each reporting date. Assets that exhibit any of the signs will have recoverable amount estimated.

For the purpose of impairment testing, assets that generate cash inflows that are largely independent of cash inflows from other assets or groups of assets are determined as a smallest

identifiable group of assets. Goodwill acquired through business combination is allocated to cash-generating units or groups of cash-generating units that are expected to benefit from the business combination.

Recoverable amount is determined as fair value less disposal cost or the utilization value, whichever the higher. Utilization value is assessed by discounting projected cash flows to the present value using the pre-tax discount rate. This discount rate reflects the time value that the market has currently priced for the given currency, and risks that are specific to the given asset or cash-generating unit.

If the recoverable amount of an individual asset or cash-generating unit falls below its book value, the difference is recognized as impairment loss.

Impairment losses are immediately recognized through current profit or loss against a reduction to the book value of goodwill that has been allocated to the cash-generating unit; any remaining amount of impairment will then be taken to reduce book values of other assets within the unit on a pro-rated basis (i.e. proportionally based on book value weight of each asset).

Goodwill impairment is not reversed in any case. For non-financial assets other than goodwill, impairment losses can be reversed provided that doing so does not exceed the new book value (net of depreciation or amortization) of the particular asset if impairment losses were not recognized in the first place.

(XIV)Revenue recognition

1. Revenue from contracts with customers

Income is measured as the amount of consideration expected to receive for the delivery of merchandise or service. The Company recognizes income when control of merchandise or service has been transferred to customers and the contractual obligations fulfilled. A more detailed description by main revenue categories is as follows:

(1) Sale of merchandise

The Company manufactures and sells LCD display modules. The Company recognizes revenues when control of product has been transferred. Product control is deemed to have transferred upon delivery, at a time when customer is able to exercise full discretion over the use of sales channel and selling price and no unfulfilled obligations exist that may otherwise affect customer's acceptance of the product. Delivery is deemed to have taken place when products are shipped to the designated location where all risks of obsolescence and loss are assumed by the customer, and that the customer accepts the products according to sales contract, thereby voiding the acceptance clause, or under any other circumstances where the Company has objective evidence to prove having satisfied all inspection criteria.

The Company recognizes accounts receivable at the time merchandise is delivered, as the Company has unconditional rights to collect consideration at this point.

(2) Financial component

The Company expects no more than one year between the time at which merchandise or service is transferred to customers and the time at which payment is received for such merchandise or service for all its customers. As a result, no time value adjustment is made to the transaction price.

(XV) Accounting for sale of raw materials and buyback of finished goods

The Company sells raw materials directly to Mainland subsidiaries for production; some of the finished goods are bought back directly by the Company and sold to customers. When preparing financial statements, this type of material sale is accounted as subcontracted processing in accordance with Correspondence No. (87)-Tai-Tsai-Cheng-(6)-00747 issued by Securities and Futures Institute on March 18, 1998, in which the sale of raw materials is offset against sales revenues and cost of sales.

(XVI)Employee benefits

1. Defined contribution plan

Obligated contributions under the defined contribution plan are recognized as employee benefit expense through profit or loss for the duration of services rendered.

2. Defined benefit plan

Pension plans other than defined contribution plan are treated as defined benefit plans. The Company's net obligation under defined benefit plans are determined as the present value of employees' future benefits earned from current or previous services rendered. Fair value of any plan asset is deducted from net defined obligations. The discount rate is determined based on market yield of a government bond that has maturity date close to expiration of the Company's net obligation and is denominated in the same currency as expected benefit payment as of the reporting date.

Net obligations are estimated by a qualified actuary using the Projected Unit Credit Method on a yearly basis. Where actuarial results are favorable to the Company, the asset ceiling is determined as the present value of economic benefits available in the form of refund or reductions in future contributions. When calculating present value of economic benefit, the Company takes into consideration the minimum contribution requirement of all applicable plans. A benefit is considered to provide economic value to the Company if it can be realized over the course of a plan or upon settlement of plan liabilities.

Should plan benefits improve in the future, the increase in benefit that is attributed to previous services rendered by employees are recognized as expense immediately through profit or loss.

Remeasurement of net defined benefit obligation (asset) includes: (1) Actuarial gains/losses; (2) Return on plan assets, but excluding net interests that are already included as apart of net defined benefit obligation (asset); and (3) Changes in the effect of the asset ceiling, but excluding net interests that are already included as apart of net defined benefit obligation (asset). Remeasurement of net defined benefit obligation (asset) is recognized under other comprehensive income. However, the Company may choose to transfer amounts that have been recognized under other comprehensive income into retained earnings or other equity item. Amounts that have been transferred into other equity item can no longer be reclassified into profit or loss or retained earnings in subsequent periods, and such practices are applied consistently in future periods. The Company recognizes remeasurements of defined benefit plan in retained earnings.

The Company recognizes gain or loss on curtailment or settlement of defined benefit plan at the time it takes place. Gain/loss on curtailment or settlement includes all fair value changes in the plan asset and all present value changes in defined benefit obligation.

3. Short-term employee benefits

Short-term employee benefit obligation is measured on a non-discounted basis, and recognized as expense when relevant services are rendered.

If the Company has a statutory or constructive obligation to pay benefits in the current period due to services rendered by employee in the past and such obligation can be estimated reliably, the amount of short-term cash bonus or amount expected to be paid under the profit-sharing plan is recognized as liability.

(XVII) Income tax

Income tax expense comprises current income tax and deferred income tax. Current income tax and deferred income tax are recognized through profit or loss, except for amounts that arise in relation to business combination and items that are recognized directly under equity or other comprehensive income.

Based on the Company's judgment, interest and penalties related to income taxes (including uncertainty over income tax treatments) do not meet the definition of income tax, and are therefore subject to the accounting treatment of IAS 37.

Current income tax includes all income taxes refundable/payable for the current year, which is calculated based on current year's taxable income (or loss), plus any adjustment to income tax payable/refundable in previous years. This amount reflects uncertainty over income tax treatments (if any), and represents the best estimate for the amount payable/collectible using statutory or substantively enacted tax rates as of the reporting date.

Deferred income tax represents the tax impact of temporary differences between asset/liability

figures presented on reporting date and asset/liability figures used for taxation basis. No deferred income tax is recognized on temporary differences that arise under the following circumstances:

- 1. Assets or liabilities that are not originally recognized due to a merger transaction, and at the time of the transaction, (i) affect neither accounting profit nor taxable profit (tax loss), and (ii) do not give rise to equal taxable and deductible temporary differences.
- 2. Temporary differences arising from investment in subsidiaries, associated companies, and joint ventures, where the Company has control over the timing at which temporary difference is reversed and that the temporary difference is unlikely to be reversed in the foreseeable future; and
- 3. Taxable temporary differences arising from initial recognition of goodwill.

Unused tax losses and tax credits can be carried forward, added to deductible temporary differences, and recognized as deferred income tax assets to the extent that is likely to be offset against taxable income earned in the future. Deferred income tax assets are evaluated on each reporting date. Tax benefits that are not very likely to be realized will be reduced down to the realizable amount, and amounts previously reduced may be reversed up to the point where sufficient taxable income can be generated.

Deferred income tax is calculated using tax rate that is expected to be effective at the time the temporary difference is reversed. In this financial statement, the statutory tax rate or substantively enacted tax rate is used for calculation, and is deemed to have reflected uncertainty over income tax treatments (if any).

The Company will offset deferred income tax assets against deferred income tax liabilities only when the following conditions are met:

- 1. When it is legally entitled to offset current income tax assets against current income tax liabilities; and
- 2. The deferred income tax assets and deferred income tax liabilities arise in relation to income taxes imposed by the same tax authority, and the tax-paying entities meet any of the following conditions:
 - (1) The tax-paying entities are one and the same; or
 - (2) The tax-paying entities are different, but all entities have the intent to settle current income tax liabilities and assets on a netted basis or realize them at the same time, for every future period in which they expect to recover deferred income tax assets and settle deferred income tax liabilities.

Additional business income tax on unappropriated retained earnings is treated as income tax expense for the following year after a resolution is sought during the annual general meeting to retain the earning.

(XVIII) Earnings per share

The Company presents earnings per share attributable to the Company's common shareholders in basic and diluted terms. Basic earnings per share of the Company is calculated by dividing the amount of profits attributable to the Company's common shareholders with the weighted average number of outstanding common shares for the given period. Diluted earnings per share is calculated after adjusting the amount of profits attributable to the Company's common shareholders and weighted average number of common shares for the dilutive effect of potential common shares.

(XIX) Segment information

The Company has already disclosed segment information in the consolidated financial statements, therefore no segment information is disclosed in the parent company only financial statements.

V. Sources of uncertainty to significant accounting judgments, estimates, and assumptions

When preparing the parent company only financial statements, the management is required to make judgments, estimates, and assumptions in accordance with "Regulations Governing the Preparation of Financial Reports by Securities Issuers." These judgments, estimates, and assumptions may affect the types of accounting policies adopted and amounts of asset, liability, income, and expense reported. The actual outcome may differ from initial estimates.

The management examines its estimates and assumptions on an ongoing basis. Impacts from changes in accounting estimate are recognized in the year the changes take place and in future years when impacts materialize.

Accounting policies that involve significant judgment and have material effect on the amounts recognized in the parent company only financial statements are explained below:

(I) Please refer to the 2023 consolidated financial statements for more details on how the management forms its judgment of whether the Company has control and material influence over associated companies.

Below is a list of assumptions and estimates that are highly uncertain and may result in significant adjustments in the following year:

(I) Valuation of inventory

Due to the fact that inventory is measured at the lower of cost and net realizable value, the Company assesses inventory on each reporting date for any decrease in sales value due to normal wear, obsolescence, or absence of market demand, and reduces inventory cost to net realizable value accordingly. This inventory valuation is made by estimating product demand within a specific period of time in the future, which may give rise to significant changes due to rapid development of the industry. For details on inventory valuation, please refer to Note

6(4).

VI. Notes to major accounts

(I) Cash and cash equivalents

	20	23.12.31	2022.12.31
Petty cash and cash on hand	\$	299	454
Check and current deposits		577,803	464,589
Time deposits		-	19,800
	\$	578,102	484,843

Please see Note 6(14) for detailed disclosure of exchange rate risk, interest rate risk, and sensitivity analysis on the Company's financial assets and liabilities.

Some of the Company's time deposits have been placed as collateral and presented as Other financial assets - current. Please see Note 6(3) and 8 for details.

(II) Notes & accounts receivable (including related parties)

		23.12.31	2022.12.31
Notes receivable	\$	6	1,469
Accounts receivable		154,643	207,800
Accounts receivable - related parties		1,449	38,390
		156,098	247,659
Less: loss provisions		-	_
Notes and accounts receivable (net)	<u>\$</u>	156,098	247,659

The Company adopts the simplified approach to estimate expected credit loss on all notes and accounts receivable, which involves measuring expected credit loss for the duration of its receivables. To facilitate this approach, notes and accounts receivable are divided into several groups of common credit risk characteristics by assessing customers' ability to make contractual payments at maturity. This approach takes into account forward-looking information such as the macroeconomic outlook and industry prospects. Expected credit loss analysis for notes and accounts receivable is explained below:

			2023.12.31	
	Book value of notes and accounts receivable		Weighted average expected credit loss rate	Provision for expected credit loss over the remaining duration
Current	\$	151,887	0%	-
Overdue 31 - 60 days		3,699	0%	-
Overdue 61 - 90 days		7	0%	-

Overdue 91 - 180 days		505	0%	-
Overdue 181 days and above			100%	
	\$	156,098		
			2022.12.31	
	n a	ok value of otes and ccounts eccivable	Weighted average expected credit loss rate	Provision for expected credit loss over the remaining duration
Current	\$	236,728	0%	-
Overdue 31 - 60 days		10,839	0%	-
Overdue 61 - 90 days		70	0%	-
Overdue 91 - 180 days		22	0%	-
Overdue 181 days and above			100%	
	\$	247,659		_

The Company's changes in loss provisions on notes and accounts receivable in 2023 and 2022 are explained below:

	2023	2022
Opening balance	\$ -	28,163
Impairment loss recognized	341	-
Unrecoverable amount charged off in the current year	 (341)	(28,163)
Closing balance	\$ _	_

None of the Company's notes receivable and accounts receivable was placed as collateral as at December 31, 2023 and 2022.

Please see Note 6(14) for more details on exchange rate risk and sensitivity analysis concerning the Company's notes and accounts receivable for 2023 and 2022.

(III)Other financial assets - current

	202	3.12.31	2022.12.31
Restricted bank deposits	\$	2,500	2,500
Other receivables (including related parties)		4,825	8,306
	<u>\$</u>	7,325	10,806

The Company had placed some of its time deposits that did not meet the definition of cash equivalent as collaterals for customs guarantee as at December 31, 2023 and 2022. Please see Note 8 for details.

(IV)Inventory

2023.12.31	2022.12.31
4043.14.31	4044.14.31

Timbled goods	Ψ	20,007	10,770
Work-in-progress and semi-finished goods		21,601	28,380
Raw materials		45,987	34,581
Merchandise		1,528	7,637
	\$	97,923	87,374
Details of operating costs recognized by the Company:		2023	2022
Selling costs and expenses	\$	1,431,899	1,794,196
Reversal of inventory obsolescence and devaluation los	SS	(13,458)	(9,288)
Inventory write-off and others		12,643	15,977
	\$	1,431,084	1,800,885

28.807

16.776

The Company scrapped the inventories in 2023 and 2022 so that the net realizable values of the inventories were lower than the costs, resulting in a reversal of the allowance for losses.

None of the Company's inventory was pledged as collateral as at December 31, 2023 and 2022.

(V) Equity-accounted investments

Finished goods

The Company's equity-accounted investments as at the reporting date are presented below:

	20	023.12.31	2022.12.31
Subsidiary	\$	929,218	850,113
Associated companies		189,907	159,795
		1,119,125	1,009,908
Less: unrealized gain/loss		(2,011)	(3,298)
	<u>\$</u>	1,117,114	1,006,610

1. Subsidiaries

(1) Please refer to the 2023 consolidated financial statements.

2. Associated companies

(1) The Company's share of profit or loss from associated companies for 2023 and 2022 is summarized below:

		2023	2022
The Company's share of current net income	<u>\$</u>	58,314	34,211
from associated companies			

(2) Information of associated companies that are significant to the Company:

January 1, 2022	\$	184,079	253,747	36,271	11,902	485,999

The Company had placed some of its property, plant, and equipment as collateral for long-term borrowings and credit limits as at December 31, 2023 and 2022. Please see Note 8 for details.

(VII) Long-term borrowings

Details, conditions, and terms of the Company's medium-term and long-term borrowings are as follows:

conows.		2023.12.31	
	Currency	Year of maturity	Amount
Unsecured bank borrowings	NTD	114	\$ 11,667
Secured bank borrowings	NTD	114	41,962
Less: portion maturing within 1			
year			(42,431)
			<u>\$ 11,198</u>
Unused limit			<u>\$ 104,538</u>
Interest rate range			<u>1.45%~1.48%</u>
		2022.12.31	
	Currency	Year of maturity	Amount
Unsecured bank borrowings	NTD	2023-2025	\$ 21,667
Secured bank borrowings	NTD	2023–2025	64,862
Less: portion maturing within 1			
year			(32,900)
			<u>\$ 53,629</u>
Unused limit			<u>\$ 104,538</u>
Interest rate range			<u>1.33%~1.35%</u>

- 1. Please see Note 6(14) for details on the Company's interest rate, exchange rate, and liquidity risk exposure.
- 2. Collaterals placed for bank borrowings
 - (1) Please see Note 7 for information regarding guarantors of the Company's short-term and long-term borrowings.
 - (2) Please see Note 8 for bank borrowings secured with the Company's assets.

(VIII)Employee benefits

1. Defined benefit plan

Reconciliation between present value of defined benefit obligations and fair value of plan assets:

	2()23.12.31	2022.12.31
Present value of defined benefit obligations	\$	(63,469)	(64,653)
Fair value of plan assets	-	50,802	50,369
Net defined benefit liabilities	\$	(12,667)	(14,284)

Contributions for defined benefit plan are made to a dedicated pension fund account opened with Bank of Taiwan. For retirees who opted for the pension scheme mentioned in the Labor Standards Act, the amount of pension benefit is calculated based on average salary for the six months preceding their retirement and the number of basis points accumulated over the duration of their service.

(1) Composition of plan assets

Pension fund contributions that the Company has made in accordance with the Labor Standards Act are collectively managed by the Bureau of Labor Funds (BLF), Ministry of Labor. Pursuant to "Regulations for Revenues, Expenditures, Safeguard and Utilization of the Labor Retirement Fund," plan assets can only be allocated to investments that offer annual yields higher than the 2-year time deposit rate quoted by local banks.

As at the reporting date, balance of the Company's labor pension reserve account held with Bank of Taiwan totaled NT\$50,802 thousand. Please visit the BLF website for more information such as fund yield and allocation of fund assets.

(2) Changes in present value of defined benefit obligations

The Company's changes in present value of defined benefit obligations for 2023 and 2022 are explained below:

	 2023	2022
Defined benefit obligations as at January 1	\$ (64,653)	(69,073)
Service cost and interest in the current		
period	(978)	(673)

31	\$ (63,469)	(64,653)
Defined benefit obligations as at December		
Payment of plan benefits	 3,882	2,092
Service costs for the previous period	-	392
liabilities (assets)	(1,720)	2,609
Remeasurement of net defined benefit		

(3) Changes in the fair value of pension plan assets

The Company's changes in the fair value of defined benefit plan assets in 2023 and 2022 are explained below:

	 2023	2022
Fair value of plan assets as at January 1	\$ 50,369	45,114
Interest income	652	314
Remeasurement of net defined benefit		
liabilities (assets)	407	3,909
Amount contributed to the plan	3,256	3,124
Payment of plan benefits	 (3,882)	(2,092)
Fair value of plan assets as at December 31	\$ 50,802	50,369

(4) Expenses recognized in profit or loss

The Company recognized the following expenses in profit or loss in 2023 and 2022:

		2023	2022
Service costs for the current period	\$	151	197
Net interest on net defined pension liabilities (assets)	\$	175	162
Service costs for the previous period		-	(392)
	\$	326	(33)
Operating costs	\$	150	165
Selling and marketing expenses		39	43
General and administrative expenses		72	(313)
Research and development expenses		65	72
	<u>\$</u>	326	(33)

(5) Actuarial assumptions

Key actuarial assumptions that the Company had made to determine the present value of defined benefit obligations as at the reporting date are as follows:

	2023.12.31	2022.12.31
Discount rate	1.20%	1.30%

Future salary increase

2.00%

2.00%

The Company expects to contribute NT\$1,655 thousand to the defined benefit plan within one year from the 2023 reporting date.

The defined benefit plan has a weighted average duration of 9 years.

(6) Sensitivity analysis

When calculating present value of defined benefit obligations, the Company is required to exercise judgments and make estimates in order to determine actuarial assumptions as at the balance sheet date. These assumptions include the discount rate and future salary changes. Any changes in actuarial assumption may cause significant impacts on the Company's defined benefit obligations.

The following shows impact of changes in actuarial assumption on the present value of defined benefit obligations as at December 31, 2023 and 2022:

	Impact on defined benefit obligations		
	0.25% increase 0	.25% decrease	
December 31, 2023		_	
Discount rate	(1,438)	1,490	
Future salary increase	1,474	(1,431)	
December 31, 2022			
Discount rate	(1,560)	1,618	
Future salary increase	1,603	(1,553)	

The above sensitivity analysis assumes changes to one variable at a time while keeping all other variables constant. In reality, however, multiple assumptions may change at the same time and are related to each other. The sensitivity analysis was conducted using the same method as how net pension liabilities are presented in the balance sheet. Methodology and assumption for current period's sensitivity analysis are consistent with those of the previous period.

2. Defined contribution plan

The Company's defined contribution plan complies with the Labor Pension Act, in which the Company contributes an amount equal to 6% of employees' salaries each month to employees' pension accounts held with the Bureau of Labor Insurance. Under this plan, the Company is freed of additional pension obligations (whether statutory or constructive) once it has contributed the designated amount to the Bureau of Labor Insurance.

The Company's pension expenses recognized for the defined contribution plan in 2023 and 2022 were NT\$6,848 thousand and NT\$6,542 thousand, respectively, which have been contributed to the Bureau of Labor Insurance.

(IX)Income tax

- 1. Income tax expenses
 - (1) Below are details of the Company's income tax expenses for 2023 and 2022:

	 2023	2022
Current income tax expense		
Arising from this period	\$ 5,683	19,723
Current income tax with prior-period one		
adjusted	 (1,311)	(3,249)
	 4,372	16,474
Deferred income tax expense		
Occurrence and reversal of temporary		
difference	 2,661	3,341
Income tax expenses	\$ 7,033	19,815

(2) Below are details of income tax expenses (income) recognized by the Company under other comprehensive income in 2023 and 2022:

		2023	2022
Items not reclassified into profit or loss:			
Remeasurement of defined benefit plan	<u>\$</u>	-	1,304
Items likely to be reclassified into profit or loss:			
Exchange differences on translation of financial statements of foreign operations	<u>\$</u>	(2,740)	3,241

(3) The Company's reconciliation of income tax expense and profit before tax for 2023 and 2022:

		2023	2022
Profit before tax	\$	210,351	268,849
Income tax calculated by applying local tax rate	;		
of the country where the Company is located		42,070	53,770
Net investment gains/losses and tax-exempt			
income		(17,096)	(10,111)
Change in unrecognized deductible temporary			
difference		(18,847)	(20,771)
Underestimations in past periods and others		(1,568)	(169)
Additional tax on unappropriated earnings		4,909	-
Tax incentive		(2,435)	(2,904)
	\$	7,033	19,815

- 2. Deferred income tax assets and liabilities
 - (1) Items not recognized as deferred income tax liability: None.
 - (2) Items not recognized as deferred income tax asset

The following items were not recognized as deferred income tax asset:

		23.12.31	2022.12.31
Deductible temporary differences	<u>\$</u>	39,733	58,580

Unrecognized deductible temporary differences were mostly attributed to losses on subsidiary investments; the Company did not recognize deferred income tax assets because they are not very likely to be realized in the foreseeable future.

Tax credits, as defined in the Income Tax Act, are losses certified by the tax authority in the last 10 years that can be taken to reduce current year's taxable income. Tax credits were not recognized as deferred income tax assets because the Company is not very likely to generate adequate taxable income to offset tax credits in the future.

As at December 31, 2023, the Company did not have any tax credits that were not recognized as deferred income tax asset.

Others

(3) Changes in recognized deferred income tax assets and liabilities in 2023 and 2022:

income	(3,241)		(3,241)
Balance as at December 31, 2022 \$	1,928	6,734	8,662

3. Assessment of income tax return

The Company's profit-seeking enterprise income tax returns have been certified by the tax authority up till 2021.

(X) Capital and other equity items

1. Common share capital

A resolution was made during the Company's annual shareholder meeting dated June 16, 2009 to increase authorized capital to NT\$2,400,000,000. This authorized capital has been legally registered.

Authorized capital as at December 31, 2023 and 2022, was reported at NT\$2,400,000,000 (13,500,000 shares were reserved to accommodate the conversion of employee warrants on both reporting dates).

2. Capital reserve

The following is a breakdown of the Company's capital reserve:

	2023.12.31		2022.12.31
Change in net worth of equity-accounted			
associated companies and joint ventures	\$	-	336
Change of ownership interest in subsidiaries		4,513	5,611
Difference between the actual price and book			
value of equity of subsidiaries			
acquired/disposed of		1,113	1,113
	\$	5,626	7,060

According to The Company Act, balances of realized capital reserve can be distributed in shares or cash back to shareholders at the current shareholding percentage after reimbursing cumulative losses. The term "realized capital reserve" mentioned above includes shares issued at premium and gains from gifts. Pursuant to Regulations Governing the Offering and Issuance of Securities by Securities Issuers, the amount of capital reserves converted into share capital is capped at 10% of paid-up capital per year.

3. Retained earnings

- A. The Company allocates year-end earnings, if any, in the following order:
 - a. Taxation.
 - b. Reimbursement of losses.

- c. 10% provision for statutory reserve, unless the balance of statutory reserve has accumulated to the same amount as the Company's paid-up capital.
- d. Provision for special reserve from current earnings in accordance with laws or relevant rules, which can be distributed only if reversed.
- e. The balance that remains after a to d is added to unappropriated earnings from previous years and is available for earnings distribution. The entirety or a portion of the residual balance can be distributed to shareholders as profit sharing at the current shareholding percentage. The final payout ratio is subject to shareholder meeting resolution according to Article 240 of The Company Act. The board of directors can be authorized to distribute all or part of the dividends or profit sharing in cash, provided that the resolution is supported by more than half of attending directors in a board meeting where at least two-thirds of board members are present, and that the decision is reported in the upcoming shareholder meeting.

B. Dividend policy

The Company is still in the growth stage given its business activities and industry involvement, and therefore has significant needs for capital to support major investments and expansion plans in the future. For the consistency of dividend payouts, the board of directors may choose to pay more than 70% of distributable earnings as dividends, with no less than 20% of dividends being cash, after taking into consideration the Company's business prospects and capital availability. The board may also opt to pay a higher percentage or the entirety of dividends in cash if capital can be sourced through alternative means or at times of abundant liquidity, and thereby avoid over-diluting earnings per share.

(1) Statutory reserve

The Company may distribute statutory reserve in cash or in shares in the absence of cumulative losses, subject to resolution of a shareholders meeting; however, only the amount of statutory reserve that exceeds 25% of paid-up capital is distributable.

(2) Special reserve

In accordance with the regulations of the Financial Supervisory Commission, when distributing available surplus, the Company shall make a special reserve from the current year's net profit after tax and the items other than the current year's net profit after tax for the difference between the net deduction from other shareholders' equity for the current year and the special reserve appropriated as stated above. For any subsequent reversal of the deduction from other shareholders' equity, the amount

reversed may be distributed from the surplus profit derived from the reversal. If the amount debited to other shareholders' equity is reversed afterwards, the reversed amount may be distributed as earnings.

(3) Earnings appropriation

On March 21, 2023 and March 12, 2022, the board of directors resolved a decision on the amount of cash dividends in the 2022 and 2021 earnings appropriation plan that includes the following dividends to be paid to shareholders:

		202	.2	202	21
		Stock dividends per share (NTD)	Amount	Stock dividends per share (NTD)	Amount
Dividends distributed to ordinary shareholders:)				
Cash	\$	0.70	113,521	0.19	30,813

On March 12, 2024, the board of directors proposed its 2023 earnings appropriation plan. The details of the dividends to be paid to shareholders are as follows:

	2023		
	div per	tock idends share NTD)	Amount
Dividends distributed to ordinary shareholders:			
Cash	\$	0.50_	81,087

(XI)Earnings per share

1. Basic earnings per share

Basic earnings per share of the Consolidated Entity for 2023 and 2022 were calculated based on net income attributable to common shareholders of the Company totaling NT\$203,318 thousand and NT\$249,034 thousand, respectively, and weighted average outstanding common shares of 162,173 thousand. Detailed calculations are explained below:

	 2023	2022
Current net income	\$ 203,318	249,034
Weighted average outstanding shares (thousand		
shares)	 162,173	162,173
Basic earnings per share (NTD)	\$ 1.25	1.54

2. Diluted earnings per share

Diluted earnings per share for 2023 and 2022 were calculated based on net income attributable to common shareholders of the Company totaling NT\$203,318 thousand and

NT\$249,034 thousand, respectively, and weighted average outstanding common shares after adjusting for dilutive effect of all potential common shares, which were 163,115 thousand and 163,427 thousand shares in the respective years. Detailed calculations are explained below:

	2023	2022
Current net income	\$ 203,318	249,034
Weighted average outstanding shares (thousand shares)	162,173	162,173
Dilutive effect of potential common shares		
Effects of employee remuneration paid in shares	941	1,254
Weighted average outstanding shares (after adjusting for dilutive effect of potential		
common shares)	163,115	163,427
Diluted earnings per share (NTD)	<u>\$ 1.25</u>	1.52

(XII) Revenue from contracts with customers

1. Breakdown of income

		2023	2022

	<u>\$</u>	1,601,156	2,055,551
Main products:			
LCD display modules	\$	1,533,565	1,936,907
Others		67,591	118,644
	<u>\$</u>	1,601,156	2,055,551

2. Contract balance

Please refer to Note 6(2) for disclosures on notes and accounts receivable and impairment. (XIII)Remuneration to employees, directors, and supervisors

Pursuant to the revised Articles of Incorporation, profits concluded from a financial year are subject to employee remuneration of no less than 5% and director remuneration of no more than 1%. However, profits must first be taken to offset against cumulative losses if any. Employee remuneration, as mentioned above, can be paid in shares or cash to employees of

affiliated companies that satisfy certain criteria. This criterion is determined by the board of directors.

The Company has estimated 2023 and 2022 employees' remuneration at NT\$11,189 thousand and NT\$14,300 thousand, respectively, and directors' remuneration at NT\$2,238 thousand and NT\$2,860 thousand, respectively. Both figures were estimated by multiplying profit before tax and employee/director remuneration with the respective percentages stated in the Company's Articles of Incorporation, and have been recognized as 2023 and 2022 operating costs or operating expenses, respectively. If the board of directors decides to pay shares as remuneration to employees, the basis for calculating the shares as remuneration shall be based on the average trading price of the common stock on the day before the resolution of the board of directors.

There is no difference between the amount of employees' and directors' remuneration distributed by the above-mentioned board of directors' meeting and the estimated amount in the 2023 and 2022 parent company only financial statements. The relevant information can be obtained from the Market Observation Post System.

(XIV) Financial instruments

1. Credit risk

(1) Amount of maximum credit risk exposure

For financial assets, the book value represents the maximum credit risk exposure.

(2) Concentration of credit risk

The customers whose purchases account for 10% or more of the Company's operating revenue accounted for 22% and 19% of its sales revenue for 2023 and 2022, respectively. As of December 31, 2023 and 2022, the accounts receivable of said customers accounted for 17% and 26% of its total accounts receivable, respectively, resulting in a significant credit concentration risk. Please refer to Note 6 (15) for the Company's credit risk management policy for more details.

(3) Credit risk of receivables

For credit risk information on notes receivable and accounts receivable, please refer to Note 6(2).

Other financial assets carried at amortized cost include other receivables and time deposits. The Company measures loss provisions based on 12-month expected credit loss for the above financial assets that are deemed to be of low risk. No impairment loss was expected on the above proceeds as at December 31, 2023 and 2022.

2. Liquidity risk

The following chart shows contract maturity date for financial liabilities, including the effect of estimated interest.

	Во	ok value	Contractua I cash flow	Within 1 vear	1-2 years	More than 2 years
December 31, 2023					<i>y</i>	
Non-derivative financial liabilities						
Notes and accounts payable	\$	45,177	(45,177)	(45,177)	-	-
Accounts payable - related parties		344,826	(344,826)	(344,826)	-	-
Long-term borrowings (including current portion maturing in one		52.620	(54.001)	(42.054)	(11.217)	
year)		53,629	(54,091)	(42,874)	(11,217)	-
Other payables		72,949	(72,949)	(72,949)	-	-
Guarantee deposits received		138	(138)	-	-	(138)
	<u>\$</u>	516,719	(517,181)	(505,826)	(11,217)	(138)
December 31, 2022						
Non-derivative financial liabilities						
Notes and accounts payable	\$	98,757	(98,757)	(98,757)	-	-
Accounts payable - related parties		189,000	(189,000)	(189,000)	-	-
Long-term borrowings (including current portion maturing in one						
year)		86,529	(87,894)	(33,844)	(42,835)	(11,215)
Other payables		79,629	(79,629)	(79,629)	-	-
Guarantee deposits received		138	(138)	-	-	(138)
	<u>\$</u>	454,053	(455,418)	(401,230)	(42,835)	(11,353)

The Company does not expect cash flows in the maturity analysis to occur at any earlier time, or in amounts that differ significantly, except for certain long-term borrowings that may be repaid early depending on capital availability.

3. Exchange rate risk

(1) Exchange rate risk exposure

The Company had the following financial assets and liabilities that were exposed to significant foreign currency/exchange rate risk:

Unit: thousands of foreign currency

	2023.12.31			2022.12.31			
	Foreign urrency	Exchange rate	NTD	Foreign currency	Exchange rate	NTD	
Financial assets	•			•			
Monetary items							
US Dollar	\$ 13,137	USD/NTD =30.755	404,028	19,592	USD/NTD =30.760	602,650	
Financial liabilities							
Monetary items							
US Dollar	11,775	USD/NTD =30.755	362,140	6,807	USD/NTD =30.760	209,383	

(2) Sensitivity analysis

The Company's exchange rate exposure arises primarily from the conversion of cash, cash equivalents, notes receivable, accounts receivable, other receivables, accounts payable, and other payables denominated in foreign currencies. Conversion of foreign currency-denominated amounts gives rise to gains/losses on exchange. The following analysis shows the effect on profit (loss) before tax for 2023 and 2022 if foreign currencies weakened/strengthened against NTD by 5% as of December 31, 2023 and 2022, using the same basis of comparison while all other factors remained unchanged:

	2023	2022
USD (relative to NTD)		
Strengthened by 5%	\$ 2,094	19,663
Weakened by 5%	(2,094)	(19,663)

(3) Exchange gain/loss on monetary items

Due to the extensive variety of transaction currencies used, the Company has opted to disclose gains (losses) on exchange of monetary items on a collective basis. Gains (losses) (including realized and unrealized) incurred on exchange of foreign currencies in 2023 and 2022 are explained below:

	·	2022	
Foreign exchange gain	\$	8,519	26,010

4. Interest rate analysis

Interest rate risk exposure concerning the Company's financial assets and financial liabilities has been explained as part of liquidity risk management in this footnote.

Sensitivity analysis has been prepared based on interest rate risk exposures of derivatives and non-derivatives as at the reporting date. For assets and liabilities that bear floating interests, the analysis is conducted by assuming that the amount of assets and liabilities outstanding as at the reporting date remained outstanding throughout the entire year. Interest rate sensitivity analyses are reported to the management by applying a variance of 0.25% above and below. This variance conforms with the management's expectation about the possible and reasonable range of interest rate variation.

If interest rate increased/decreased by 0.25% while other variables remained unchanged, the Company's profit before tax would have increased/decreased by NT\$1,310 thousand and NT\$995 thousand in 2023 and 2022, respectively. This potential change is primarily the result of the Company's floating-interest rate borrowings and demand deposits.

5. Fair value information

(1) Category and fair value of financial instruments

Financial assets at fair value through profit or loss and financial assets at fair value through other comprehensive income are measured at fair value on a recurring basis. Book value and fair value of financial assets and liabilities are shown below (categorized by level of fair value input; however, it is not required to disclose fair value information for lease liabilities and financial instruments that are not subject to fair value assessment and where the book value resembles the fair value):

	2023.12.31						
				Fair	value		
	Bo	ok value	Level 1	Level 2	Level 3	Total

one year)	86,529	-	-	-	_
Guarantee deposits	-				
received	138	_	-	-	-
Total	\$ 454,053				

There was no change of fair value input during 2023 and 2022.

(2) Fair value assessment techniques for financial instruments carried at fair value Non-derivative instruments

Financial instruments that are openly quoted in an active market will have fair value determined at the openly quoted price. Fair values of public-listed (OTC-traded) equity instruments and debt instruments openly quoted in active markets are determined based on market prices quoted on major exchange and OTC center for actively traded government bonds.

A financial instrument is deemed to be openly quoted on an active market if reliable quotations (that are representative of transactions actually and frequently taking place in a fair market) can be obtained from stock exchange, brokers, underwriters, industry associations, pricing institutions, or the authority on a timely and frequent basis. A market is deemed inactive if it fails to satisfy the above conditions. In general, increasing or excessive bid-ask spread and lack of transaction volume are considered signs of inactive market.

Except for financial instruments traded in active markets, as described above, fair values of all other financial instruments are obtained either by applying valuation techniques or by making reference to counterparties' quotations. Fair value by valuation technique may be obtained by making reference to the prevailing fair value of financial instruments that share similar terms and characteristics or using valuation techniques such as the discounted cash flow method in conjunction with market information available as at the balance sheet date.

(3) Change between level 1 and level 2

There had been no change in levels of fair value input when assessing financial instruments during 2023 and 2022.

(XV) Financial risk management

1. Summary

Use of financial instrument exposes the Company to the following risks:

- (1) Credit risk
- (2) Liquidity risk
- (3) Market risk

This footnote discloses exposure, assessment, and the Company's management goals, policies, and procedures for the abovementioned risks. For further quantitative disclosures, please see notes to the parent company only financial statements.

2. Risk management framework

The board of directors has been fully empowered to establish and supervise implementation of risk management framework within the Company. The management is responsible for the development and control of risk management policies within the Company, and reports to the board of directors on a regular basis.

The Company has established its risk management policy to identify and analyze the risks associated with business activities, to set appropriate risk limits and controls, and to monitor risk exposures as well as compliance with various risk limits. The risk management policy and system are regularly examined to reflect changes in market condition and the Company's operations. The Company develops a disciplined and constructive control environment through training, management guidelines, and operating procedures, so that all employees are able to comprehend their roles and duties.

The board of directors regularly reviews compliance of risk management policies and procedures within the Company, as well as the appropriateness of the risk management framework that the Company has adopted in response to the risks encountered. The Company has internal audit personnel in place to assist the board of directors with supervisory duties. These personnel conduct regular and ad-hoc reviews over existing risk management controls and procedures, and report their findings to the board of directors.

3. Credit risk

Credit risk refers to the risk of financial loss the Company may incur due to its customers or financial instrument counterparties being unable to fulfill contractual obligations. Credit risk mainly arises from customers' accounts receivable.

(1) Accounts receivable and other receivables

Credit risk exposure of the aforementioned accounts varies from customer to customer. The management also takes into consideration common factors including default risk

of customers' industries and countries, as these risks are also likely to affect credit risk. The Company monitors customers' financial position and recoverability of accounts receivable to minimize credit risks.

The Company has established its own credit policy, which requires every new customer to have credit rating analyzed before being awarded standard payment and delivery terms. The Company also obtains timely data from external sources, such as contact with rating agencies and banking partners, as part of its review. The Company assigns credit limits to customers on a case-by-case basis; these limits represent the maximum amount of transactions that can be undertaken on credit without the management's approval. These limits are reviewed on a regular basis. Customers that do not meet the Group's basic credit rating requirements may transact with the Company only on a prepaid basis.

(2) Investments

Credit risks associated with bank deposit and other financial instruments are assessed and monitored by the Company's Treasury Department. The Company transacts and deals only with banks of strong credit standing and financial institutions of investment grade and above, hence there is no material concern in terms of contract fulfillment or credit risk exposure.

(3) Guarantees

According to internal policies, the Company may only offer financial guarantee to subsidiaries in which it holds more than 50% voting interest and companies it has business dealings with.

4. Liquidity risk

Liquidity risk represents risk of the Company being unable to settle financial liabilities with cash or other financial assets, or being unable to fulfill relevant obligations.

The Company maintains adequate position of cash and cash equivalents to support corporate operations and to mitigate effects of cash flow variation. The management constantly monitors use of bank limits and makes sure that borrowing terms are duly complied.

Bank borrowing constitutes a main source of liquidity for the Company. The Company had undrawn short-term banking limits of NT\$150,755 thousand and NT\$149,019 thousand respectively, as at December 31, 2023 and 2022. Please see Note 6 (7) for details of undrawn long-term banking limits.

5. Market risk

Market risk refers to the effect a change of market price may have on the income or value of financial instruments held on hand, whether it is an exchange rate instrument, interest

rate instrument, equity instrument or otherwise. The goal of market risk management is to control market risk exposure within a tolerable range while optimizing investment returns.

(1) Exchange rate risk

The Company is exposed to exchange rate risks arising from sales, purchases, and borrowings that are denominated in non-functional currencies. NTD represents the Company's main functional currency; transactions are also denominated in currencies such as USD and RMB.

For monetary assets and liabilities denominated in other foreign currencies, the Company buys in or sell off foreign currencies at the spot exchange rate whenever a short-term mismatch arises, and in doing so ensures that the net exposure is kept within the tolerable level.

(2) Interest rate risk

The Company constantly monitors changes in market interest rate and maintains close relationship with financial institutions to secure the most favorable rate. Short-term, medium-term, and long-term credit limits are drawn in a manner that minimizes interest expenses.

(XVI) Capital management

The Company makes capital plans after taking into consideration the characteristics of the given industry, future prospects of the Company, and changes in the external environment. Capital management ensures that the Company has the financial resources and operational plans needed to support future working capital, capital expenditure, research and development projects, debt repayment, and dividend payment. The management primarily uses debt-to-equity ratio and interest-bearing-liabilities-to-equity ratio to determine the optimal capital structure for the Company. The management also strives to optimize debt and equity balances while maintaining strong capital structure for improvement to shareholders' returns.

The Company regularly examines its debt-to-equity ratio as a way to manage capital. Capital of the Company is represented by "Total equity" shown on the balance sheet, which equals total assets less total liabilities.

Debt-to-equity ratio as at the reporting date is shown below:

	2023.12.31		2022.12.31	
Total liabilities	\$	576,267	538,128	
Total equity		1,861,676	1,790,671	
Interest-bearing liabilities		53,629	86,529	
Debt-to-equity ratio		31%	30%	
Interest-bearing-liabilities-to-equity ratio		3%	5%	

There had been no change to the Company's capital management approach as at December 31,

2023.

(XVII) Non-cash investing and financing activities

The non-cash transaction investment and financing activities of the consolidated company in 2023 and 2022 are as follows:

	2	023.1.1	Cash flow	2023.12.31
Long-term borrowings (including current				
portion maturing in one year)	\$	86,529	(32,900)	53,629

Company

2022

2022

Mr. Shih-Yue Wang Chairman of the Company

(II) Significant transactions with related parties

1. Merchanting trade

In 2023 and 2022, the Company sold raw materials, semi-finished goods, and factory supplies to subsidiaries, and had them processed and produced before buying back the finished goods in the form of a merchandising trade. The finished goods were then sold to customers. The sale of raw materials and buyback of finished goods had been eliminated when preparing the 2023 and 2022 financial statements, and were not treated as purchase or sale.

Raw materials and semi-finished goods are sold to subsidiaries at cost, and accounts receivable that arise as a result can be offset against accounts payable from purchase.

2. Operating revenues

Material sales to related parties and amounts:

		2022	
-Subsidiary Powertip USA	\$	158,254	175,519
-Subsidiary Others		66,758	110,323
	<u>\$</u>	225,012	285,842

The Company's sales transactions are priced based on volume or location. There is no significant difference in the price of goods sold to related and unrelated parties, except for some subsidiaries where selling price is incomparable due to differences of the products involved. Collection term for sales to related parties is not significantly different from ordinary sales.

3. Purchase

Purchases made by the Company from related parties:

	2023	2022
Subsidiary - Powertip (Jiangsu)	\$ 1,273,234	1,615,872

There is no significant difference in the price of purchases made from related and unrelated

parties, except for some subsidiaries where purchase price is incomparable due to the special nature and differences of the products involved.

4. Related party payables

Related party payables that arose from the above transactions and other collections and payments made on behalf of related parties are explained below:

Presentation

account	Type of related party	2023.12.31	2022.12.31
Accounts payable	Subsidiary - Powertip (Jiangsu) \$	344,826	189,000
Other payables	Subsidiary - Powertip Samoa _	1,169	4,568
	S	345,995	193,568

5. Leases

For the years ended 2023 and 2022, the Company generated NT\$863 thousand and NT\$860 thousand of rental income from the 6-year plant, equipment, and office premise leasing agreement signed with associated companies and collected NT\$138 thousand of rental deposit as of December 31, 2023, and 2022, which were presented as guarantee deposits received and others. Furthermore, NT\$229 thousand and NT\$208 thousand of proceeds were paid/collected on behalf of associated companies for electricity, networking, and management expenses incurred on the leased plant, equipment, and office premises.

6. Property transaction

The Company had unrealized deferred gains of NT\$578 thousand and NT\$352 thousand as at December 31, 2023 and 2022, from contributing machinery and equipment as capital inlieu in a subsidiary.

7. Related party receivables

Related party receivables that arose from the above transactions and other collections and payments made on behalf of related parties are explained below:

Presentation account	Type of related party	2023.12.31	2022.12.31
Accounts receivable	-Subsidiary Powertip USA	\$ -	35,371
Accounts receivable	-Subsidiary - Powertip HK	1,449	3,019
Other receivables	-Subsidiary - Powertip Samoa	767	-
Other receivables	-Subsidiary Powertip USA	-	1,748
Other receivables	Associated companies	94	93
		<u>\$ 2,310</u>	40,231

(III) Transactions involving key management personnel

1. Compensation to key management personnel

Compensation to key management personnel includes the following:

Short-term employee benefits

\$\frac{2023}{\\$ 13,233} \frac{2022}{13,855}\$

2. Offering of guarantees

The Company's short-term and long-term credit facilities as at December 31, 2023 and 2022, were guaranteed by key management personnel.

VIII. Pledged assets

Book value of assets pledged by the Company is explained below:

Name of asset	Collateral	2	023.12.31	2022.12.31	
Time deposit (presented as other	Security for import				
financial assets - current)	customs duty	\$	2,500	2,500

Amortization expenses	-	1,182	1,182	-	1,205	1,205

Additional information on employee size and employee benefit expenses for 2023 and 2022 is presented below:

	20	023	2022
Employee count		210	226
No. of directors without concurrent position as employee		8	7
Average employee benefit expenses	<u>\$</u>	878	806
Average employee salary expenses	<u>\$</u>	730	677
Adjustments to average employee salary expenses		7.83%	
Supervisors' compensation	<u>\$</u>	-	

- (I) Information regarding the Company's salary and compensation policies (including directors, supervisors, managers, and staff):
 - 1. Compensation for staff and managers comprises two parts: fixed salary and variable salary. Fixed salary is paid on a monthly basis irrespective of profitability, and is determined based on work duties and job grades. Variable salary includes festive bonus, performance bonus, and employee remuneration. Variable salary is determined after taking into consideration the overall environment, the market level, corporate profitability, individual performance evaluation, work duties, and contribution to corporate operations. It is set at a level that adequately reflects work performance of individual employees. The level of variable compensation is set in line with current year's earnings, and is therefore highly correlated with the Company's business performance.
 - 2. Compensations for the Company's directors and supervisors are determined in accordance with the Articles of Incorporation, and take into account their individual participation and contribution to the Company's operations. Aside from business performance, the Company also follows a well-established set of compensation standards, structure, and system that is designed in reference to peers and TWSE/TPEX listed companies. The compensation standards, structure, and systems are proposed by the Remuneration Committee and resolved by the board of directors.
 - 3. All salaries and compensations paid by the Company are rigorously reviewed. Compensations to managers, directors, and supervisors are reviewed and resolved by the Remuneration Committee and the board of directors to ensure that they do not give rise to major risks in the future.

XIII. Other disclosures

(I) Information related to significant transactions
Significant transactions in 2023 that require further disclosures under Regulations Governing
the Preparation of Financial Reports by Securities Issuers are as follows:

- 1. Loans to external parties: None.
- 2. Endorsement/guarantee to external parties: None.
- 3. End-of-period holding position of marketable securities (excluding investment in subsidiaries, associated companies, and joint ventures):

Unit: thousand shares

(Dongguan)	Processing and manufacturing of LCD devices and electronic components	39,590 (HK\$10,000)	Indirect investment through Powertip HK (Note 5)	-	-	-	-	1,524 (HK\$380)	100.00%	1,524 (HK\$380)	13,065 (HK\$3,330)	-

2. Approved limit on Mainland investments:

Unit: thousands of foreign currency

Company	of investment capital transferred from Taiwan	Investment limit authorized by the Investment Commission, Ministry of Economic Affairs	Limits authorized by the Investment Commission, Ministry of Economic Affairs, for investing into Mainland China
name	into the Mainland	Economic Affairs	Mainland China
The			
Company	790,711 (US\$25,710)	792,741 (US\$25,776)	No limit (Note 2)

- Note 1: Gains/losses of investees for the current period were recognized based on audited financial statements of the parent company in Taiwan, except for Dongguan Jiuzheng, which were recognized based on their unaudited financial statements.
- Note 2: According to the rules on Mainland investment limits stipulated by the Investment Commission in the revised "Review Principles for Investment or Technological Collaboration in the Mainland Area" on August 29, 2008, the Company has already obtained proof of operational headquarters from the Industrial Development Bureau, Ministry of Economic Affairs, and therefore is not subject to the Mainland investment limit.
- Note 3: Dongguan Jiuli, one of the Company's business investments, was de-registered on January 7, 2009; the cumulative amount of investment outstanding at the end of the current period included USD 2,710 thousand of realized losses that were attributed to Dongguan Jiuli.
- Note 4: Converted into NTD using exchange rate as at the reporting date (1 USD: 30.755 NTD; 1 HKD: 3.959 NTD).
- Note 5: Powertip HK contributed proprietary funds and machinery and equipment in lieu of capital to the investment.

Through Powertip HK, a business located at a third location, the Company established Dongkeng Jiuzheng Photoelectric, a processing plant for LCD devices and electronic

components, in Dongguan, Mainland China, for a sum of HKD 9,024 thousand; this project was approved by the Investment Commission, Ministry of Economic Affairs, on November 20, 2002. Powertip HK later made an indirect investment into the Mainland and founded Powertip (Dongguan) Photoelectric Co., Ltd. by contributing HKD 5,792 thousand of its funds and the electronics plant of Dongkeng Jiuzheng Photoelectric, an existing investment approved by the Investment Commission, Ministry of Economic Affairs, valued at HKD 4,208 thousand for a total share capital of HKD 10,000 thousand. This project was approved by the Investment Commission, Ministry of Economic Affairs, on July 13, 2012 and completed on April 25, 2013.

3. Significant transactions:

Please refer to "Information related to significant transactions" in the parent company only financial statements for more details on direct and indirect significant transactions between the Consolidated Entity and Mainland investees in 2023 (which have been eliminated when preparing the consolidated financial statements).

(IV)Information on major shareholders:

Name of major shareholder	Shares	Number of shares held	Shareholding percentage
Bright LED Electronics Corp.		19,020,148	11.72%

Note: (1) Information on major shareholders, as presented in this chart, was taken from records of Taiwan Depository & Clearing Corporation as at the final business day of the reported quarter; and included parties holding book-entry common and preferred shares (including treasury stock) for an aggregate ownership of 5% and above. Share capital reported in the Company's financial statements may differ from the number of shares delivered via book entry due to different basis of preparation/calculation.

(2) Shareholders who placed shares under trust are disclosed in trustors' sub-accounts held with various trustees. Shareholders with more than 10% ownership interest are subject to insider equity reporting, according to Securities and Exchange Act. Insider equity includes shares held in own name and any shares placed under trust that the insider has control over. Please access Market Observation Post System for reports on insider equity.

XIV. Segment information

Please refer to the 2023 consolidated financial statements.
